

5 Major Changes for... Payroll

While we can expect a lot more will change with the implementation of Workday, here are 5 key things to learn about what's changing for Payroll.

1

Departments will have the ability to complete Costing Allocations and Payroll Accounting Adjustments using electronic processes and approvals.

2

Real-time information updates and increased visibility will make payroll more transparent and accurate. There will no longer be a wait between pay periods to view updates and adjustments.

3

Employee Self-Service (ESS) reduces departmental and Central Payroll workload by enabling individual employees to update their own payment elections, tax information, and personal details.

4

Positive Pay entry will shift from manual to automatic, contributing to significant time savings and workload reduction.

5

Paper checks and online earnings statements will look different. Earnings statements will have more details and give employees clearer insight into their pay, deductions, and reductions.
