

5 Major Changes for... Grants

While we can expect a lot more will change with the implementation of Workday, here are 5 key things to learn about what's changing for Grants.

1

Sponsored Programs will be able to leverage automated processes to generate invoices and financial reports, enabling electronic routing for review and improving transparency for departments.

2

Grant Managers will have approval authority on all grant transactions.

3

Grant Managers and Principal Investigators will have increased visibility into award billing and reporting activities, grant budget to actuals, and cost share obligations.

4

Cost share will post in real-time each payroll period, when transactions are coded with appropriate cost share grant worktags.

5

Effort Certification will route electronically with three certification periods per year (summer periods will be combined after launch).
